Introduction

This report presents the estimated college-going rates for each of Nebraska's 276 public high schools that awarded regular high school diplomas in 2009-2010. These estimates are based on data obtained from the Nebraska Department of Education (NDE) and the National Student Clearinghouse (NSC).

The National Student Clearinghouse is a not-for-profit organization that serves as a central repository of postsecondary student enrollment, degree and diploma data voluntarily submitted by more than 3,300 colleges and universities. In total, these institutions enroll more than 90% of the college students in the United States.

The National Student Clearinghouse is currently the only reliable source of data for estimating the college continuation rates of all of Nebraska's public high schools. The data obtained from the Clearinghouse are not perfect because some Nebraska high school graduates go to colleges that do not submit their enrollment files to the Clearinghouse. However, the estimates based on Clearinghouse data are the best available.

The lists in this report provide the number of on-time graduates from each of Nebraska's public high school in 2009-2010, based on NDE records. Only "on time" graduates—students who graduated from high school in four years or less—are included. This report does not include students who required longer than four years to graduate from high school or students who graduated from Nebraska's nonpublic (private) high schools. Data for these schools are not readily available.

The lists in this report also include the number of 2009-2010 graduates who continued on to college from each high school as of April 28, 2011, based on NSC records. The college-going rate of each school is the percentage of on-time graduates who continued on to college.

The following four lists present the college-going rates of the 2009-2010 graduates of Nebraska's public high schools:

List 1—the schools in alphabetical order by district and school name

List 2—the schools in rank order, based on their college-going rates—highest to lowest

List 3—the schools sorted by NSAA classification

List 4—the college-going rates of the 2009-2010 graduates compared to the college-going rates of the 2007-2008 graduates from the same high schools. (The latter rates are the percentages of the 2007-2008 graduates who had continued on to college as of April 7, 2009.)
